

Dylo-Grip Plastic Expansion Plugs (Rawal Plugs)

- **Testing** - PULL LOAD Suitable for use in Brick, Block & Concrete
- **Material** : Grey in reprocess HDPE, Natural In Virgin HDPE
- Dylo-Grip Plastic Expansion Plugs (Rawal Plugs) are made from HDPE polymer and are designed to expand and grip in the substrate medium without slippage. Can be used for securing all types of light fixtures, aluminum sliding windows and partitions, canopy fixing, false ceiling, bird netting installation's etc.
- Dylo-Grip anchors have large fins that prevent rotation. They reinforce the hole and resist stripping. To install, drill a hole slightly deeper than the length of the anchor and insert the anchor until it's flush with the surface. Next, thread a sheet metal or wood screw through your fixture and into the anchor. To determine screw length, add the anchor length to the fixture thickness and choose a screw longer than it. Pull-out strength values are 25% of the ultimate values.

Dylo-Grip Nylon Anchor

- **Colour:** Red
- **Testing:** pull Load
- **Material:** Polyamide 6 (Nylon)

Fire resistant materials can be made to order prices subject to availability and MOQ.

Dylo-Grip nylon anchors are an easy and secure way of fastening heavy loads permanently like fixing door frames, dish antennae, plumbing accessories, etc.

Screws provided are with carbon steel torx head screw, MS phillipshead screw
