## Technology with a cutting Edge

### LAMELLAR/FLAP WHEEL

- Longer Life : continuous grinding ensures higher productivity & Automation
- Burn Free : Unique air cooling prevents burning and thermal deformation of Job.
- Exquisite Surface finish : Due to graded grains & electro coating, surface finish is even & scratch free.
- Removes grinding Marks, scales on different type of metals.
- Removes burr from plastic and formed parts.

### CUPWHEEL

- Has an abrasive cloth thrust vertically in fibre.
- This ensures there is no scratch marks on the job being ground.
- Special air cooling effect prevents burning. This ensures no thermal deformation.
- Has a longer life than a paper disc. Replacement time is also reduced.
- Spotters are expelled during spot welding. Metallic Burrs expelled.
- Easily grinds hard metals and tough to grind materials.
- Grinding for rust removal, plating and painting.
- Removes paint.

### SECTOR/MOP WHEEL

This unique wheel replaces wire brush application. Furthermore, there is no danger of scoring or scratching. It also produces a finer internal finish. Another feature is that Sector Wheel's resilient abrasive cloth segment squeeze into small openings and expand inside. A mopping action is created by this resiliency which cleans, polishes all inside surfaces equally. Metal containers too can be polished.

### SPINDLE WHEEL

- Removes rust, burr and paint.
- Die grinding.
- Grinding of interiors of half cylinders and corners.
- Can grind inner surfaces of pipes.
- Excellent grinding of curved and irregular surfaces of metal & Wood.
- Mounting Tools
- Grinders (Pneumatic or Electric)
- Electric Drill
- Drilling Machine
- Flexible shaft
